Son Tra, Da Nang

Dear NCC Da Nang Hiring Management,

My name is Nguyễn Thị Dung, and I am currently a second-year student majoring in Information Technology at Passerelles Numériques Vietnam (PNV). I am writing to express my interest in the Fullstack Developer Intern position at NCC Da Nang. I found the recruitment information on Facebook, and after reviewing the requirements, I believe my technical skills and mindset are well aligned with this role.

During my studies at PNV, in addition to technical knowledge, I have been trained in essential soft skills for a professional working environment. I understand the importance of responsibility, teamwork, and effective communication. I actively collaborate with teammates, participate in discussions to ensure requirements are clearly understood, and contribute to maintaining a smooth development workflow. I am also adaptable and willing to learn new technologies, which helps me quickly improve my performance in projects.

Regarding my technical background, I have gained hands-on experience in both front-end and back-end development through projects such as the Library Management System. In this project, I used HTML, CSS, JavaScript, PHP, and MySQL to build and improve both user interfaces and system functionalities, applying the MVC model to structure the application clearly. I focused not only on creating clean and user-friendly interfaces but also on handling data processing, database interaction, and ensuring the overall system works efficiently. Additionally, my team used Git and GitHub for version control and collaboration, and Jira to manage tasks and track progress in an Agile environment. Through these experiences, I developed a solid understanding of how a fullstack application is designed, developed, and maintained.

I am particularly impressed by NCC Da Nang's professional working environment and its focus on developing high-quality software products. I am passionate about becoming a fullstack developer and eager to strengthen both my front-end and back-end skills. I believe that my attention to detail, willingness to learn, and positive attitude will allow me to contribute effectively to your development team while continuously improving myself.

I am available for an interview to further discuss my qualifications and career goals. For more detailed information, please refer to my [CV](#).

Thank you very much for your time and consideration. I look forward to the opportunity to join NCC Da Nang and contribute to your team. You may contact me via email at dung.nguyen27@student.passerellesnumeriques.org or by phone at 0368213031.

I look forward to hearing from you soon.

Best regards,

Nguyễn Thị Dung
