Son Tra, Da Nang

Dear Glotech JSC Hiring Management,

My name is Nguyễn Thị Dung, and I am currently a second-year student majoring in Information Technology at Passerelles Numériques Vietnam (PNV). I am writing to express my interest in the Software Tester Intern position at Glotech JSC. I found the recruitment information on Facebook, and after careful review, I believe that my knowledge and soft skills are well aligned with the requirements of this role.

During my studies at PNV, in addition to technical knowledge, I have been trained in soft skills, which are essential foundations in a professional working environment. I understand the importance of responsibility, effective teamwork, and clear communication. I always maintain positive relationships with my teammates, actively participate in discussions to ensure project requirements are met, and keep the workflow running smoothly. In addition, I have learned problem-solving skills and the ability to quickly adapt to new processes, which are important qualities of a reliable team member.

Regarding my technical background, I have gained practical experience through developing a Library Management System project. In this project, I used technologies such as HTML, CSS, and PHP, and applied the MVC model to organize and develop the system in a clear and structured way. Furthermore, our team used Git and GitHub to manage source code and collaborate effectively, as well as Jira to manage tasks, assign responsibilities, and track project progress. We also applied the Agile methodology to ensure a flexible development process and optimize team performance. Through this project, I gained a better understanding of how a web product is built and operates, from the user interface to backend logic. These experiences provide me with a foundation to analyze systems, identify potential bugs, and create detailed test cases, contributing to ensuring product quality before it reaches users.

I am particularly impressed by Glotech JSC's modern and innovative product development direction, as well as its professional working environment that encourages growth. With a strong willingness to learn, persistence, and a passion for product quality, I aspire to become a part of the Quality Assurance team at Glotech JSC. I believe that my attention to detail will allow me to contribute positively to the company's success while also giving me valuable opportunities to learn from industry experts.

I am available for an interview to further discuss my qualifications and career goals. For more detailed information about my education and experience, please refer to my [CV](#).

Thank you very much for taking the time to consider my application. I look forward to the opportunity to join Glotech JSC and contribute to the company's continued success. I hope to have the chance to work alongside your professional team. You may contact me via email at dung.nguyen27@student.passerellesnumeriques.org or by phone at 0368213031.

I look forward to hearing from you soon.

Best regards,

Nguyễn Thị Dung
